Product Description

Aella Aluminum Billet Brake Lever
AE-58005

Presenting a rare and unique brake lever that is only seen on the WSBK and MotoGP bikes. This unique brake lever is hand built in Japan for race teams and is only available through Aella. Adopting aluminum contributes to weight reduction and improved looks, while the AELLA logo is engraved on the left side with a laser to casually appeal the brand. Fully adjustable lever allows more play for better braking control and the lever folds up in case of a fall or drop. This is a unique product that is being offered for the first time in India through Lanesplit, Aella's brand partner.

Product Description

Aella Carbon Fiber Smoked Windscreen AS-006-10-04

Presenting a rare and unique windscreen that is only seen on the WSBK and MotoGP bikes. This unique windscreen is hand built in Japan for race teams and is only available through Aella. Adopting dry carbon trim contributes to weight reduction and improved looks, while the screen is made of specially processed acrylic with excellent scratch resistance, and has excellent visibility without distortion. The AELLA logo is engraved on the right side with a laser to casually appeal the brand. This is an unique product that is being offered for the first time in India through Lanesplit, Aella's brand partner.

Aella Frame Slider BMW S 1000 RR (19-22 models)

AE-68129

[Read More](#)

SKU:

Price: ₹22,500.00

Categories: [Frame Slider](#)

Product Description

Aella Frame Slider AE-68129 Japan's most famous accessories and special parts company has teamed up with Lanesplit. Introducing Aella's frame sliders for the BMW S 1000 RR. These are hand crafted in Japan. In the case of a conventional slider due to the shape of the frame, the left and right mounting heights will differ, but the new design has been made so that they are almost the same height. AELLA's unique taper shape makes it less likely to stick out, and the slider functions well while maintaining a clean impression. The frame slider suppresses damage caused by unexpected falls. Since the frame of the new S1000RR is thin, if the force at the time of falling is transmitted directly to the frame, it may be damaged more than expected. Therefore, the right side adopts a new mechanism that releases the force applied during the fall. Furthermore, "heat-resistant bump rubber" is installed on both sides of the slider to avoid contact with the frame. Install the left side away from the mounting position and distribute the force at the time of the fall at the slider base. In addition, the "heat-resistant bush rubber" used in engine guards, etc., is installed so that this side does not come into direct contact with the frame.
