### Product Description

Akrapovic GP Style Titanium Slip On Exhaust S-B10SO11-CBT The GP Style Titanium Slip On Exhaust presents the first step in tuning exhaust systems. It is simple to install and replaces a standard terminal, offering the best compromise between price and performance. With the Akrapovic Slip-On system we have more power, the unmistakable deep and thundering Akrapovic sound, greater torque value and less weight. Each terminal is equipped with high-quality carbon fiber bottoms, also produced by Akrapovic.

### Product Description

The flagship of the Akrapovič exhaust system range, used and tested by top factory teams in motorsport racing. It is simply the finest performance exhaust system available. Each model is unique and dedicated to maximizing the performance of an engine, while reducing overall weight for optimized handling of the whole motorcycle. It is made entirely of titanium. The unique shape of the muffler, with its embossed imprint that runs all the way along the exhaust

and blend in seamlessly with the hand-crafted carbon fiber endcap, takes design to new levels. For perfect performance, throttle response and durability, ECU remapping is recommended. On the product image, the system is shown together with optional carbon heat shield P-HSB10E3. Carbon fibre muffler bracket (needed for mounting if passenger footrests are removed) is already included within the system. S-B10E10-APLT
