Price: ₹3,900.00

Categories: Brake Pad

Product Description

07GR90SA Product Detail This is a sintered compound, specific for front application, characterized by excellent efficiency in all conditions of use. It therefore represents an ideal alternative to original brake pads, both when cold and when hot. This compound is characterized by low wear which guarantees long life and suitable mileage. 2 brake pads are sold with this set. They will fit 1 caliper.

Brembo Master Cylinder 19RCS Corsa Corta 110C74010 Aprilia

110C74010

Read More

SKU:

Price: ₹41,000.00

Categories: Master Cylinder

Product Description

Brembo 110C74010

The 19RCS CORSA CORTA is characterized by the possibility it provides the rider to adapt the braking "bite point" to the desired riding feeling, in addition to the RCS (Ratio Click System), introduced 10 years ago on the Brembo 19RCS radial brake master cylinder, which allows the center distance of the master cylinder to be adjusted to "18" or "20". The master cylinder body is made of forge aluminum alloy, machined with 5-axis CAM technology. A hard oxide coating is used for the surface finish, which guarantees that the master cylinder main body is highly resistant to wear and its components move easily. The floating piston and the seals derive directly from those used in MotoGP, as do the housings for the bleeding and fueling systems, which are inclined by more than 30° to make bleeding the master cylinder easier.

A hard oxide coating is used for the surface finish, which guarantees that the master cylinder main body is highly resistant to wear and its components move easily. The floating piston and the seals derive directly from those used in MotoGP, as do the housings for the bleeding and fueling systems, which are inclined by more than 30° to make bleeding the master cylinder easier.

Product Description

Brembo 110C74010

The 19RCS CORSA CORTA is characterized by the possibility it provides the rider to adapt the braking "bite point" to the desired riding feeling, in addition to the RCS (Ratio Click System), introduced 10 years ago on the Brembo 19RCS radial brake master cylinder, which allows the center distance of the master cylinder to be adjusted to "18" or "20". The master cylinder body is made of forge aluminum alloy, machined with 5-axis CAM technology. A hard oxide coating is used for the surface finish, which guarantees that the master cylinder main body is highly resistant to wear and its components move easily. The floating piston and the seals derive directly from those used in MotoGP, as do the housings for the bleeding and fueling systems, which are inclined by more than 30° to make bleeding the master cylinder easier.

SKU:

Price: ₹45,000.00

Categories: Brake Caliper

Product Description

Brembo Racing Red Radial Brake Caliper M4 Monoblock 100mm White 120988588 This monobloc caliper, obtained from a single piece of molten aluminum alloy, concentrates the most advanced casting and processing technologies to obtain a monolithic caliper body of absolute lightness, with excellent rigidity values and operating precision. Particular attention has been paid to the hydraulics and the shape of the caliper body, both subject to careful technical refinement work. The caliper body, inside which there are 4 pistons with a diameter of 34 millimeters, is characterized by significant rigidity values obtained thanks to the characteristic triple bridge shape. With the cast monoblock calipers, Brembo makes available to all enthusiasts the technology, successfully used in MotoGP, which allows the caliper body to be obtained from a single piece of molten aluminum, thus ensuring optimal rigidity. Model: M4 Side: Left Wheelbase: 100mm Caliper body: Monoblock Number of pistons: 4 Pistons diameter: 34mm H. brake band: 34mm Material: Cast aluminum Superficial protections: Red with white logo Pistons material: Aluminum Weight without pads: 800gr Offset: 30mm The box in addition to the caliper contains: instruction manual, Brembo stickers, banjo and washers for assembling the hose fitting. **NOTE: CALIPER SOLD INDIVIDUALLY (NOT IN KIT)**

Product Description

07BB03SP Product Detail This is a sintered compound, specific for front application, characterized by excellent efficiency in all conditions of use. It therefore represents an ideal alternative to original brake pads, both when cold and when hot. This compound is

characterized by low wear which guarantees long life and suitable mileage. 2 brake pads are sold with this set. They will fit 1 caliper.

Product Description

Brembo Series Oro Fixed Rear Brake Rotor
68B407H1
Brembo offers with the Gold Series a complete line of rotors that can satisfy any need: perfectly interchangeable with the series rotors , they are the choice of riders who do not want to renounce the Brembo quality. They are composed of the braking strip in stainless steel, connected through 10 pawls to the bell made of aluminum alloy, the latter worked CNC and then anodized. The pawls allow a controlled movement between the band and the bell and allow the materials to dilate when stressed while remaining in the correct operating tolerances.

Product Description

Brembo Supersport 320 Front Brake Rotor 208973767 **RACING USE ONLY Compatible with original brake calipers, NOT compatible with Brembo racing low end calipers** Brembo Racing SuperSport discs with a thickness of 5.5 mm. they are exactly interchangeable with the

originals and suitable to work both with the stock calipers as well as with some Brembo Racing calipers. Winners of the SuperSport and SuperStock 1000 World Championships, they are fully floating discs made up of a thermally treated martensitic steel braking ring (capable of withstanding any thermo-mechanical stress) and a billet aluminum alloy bell. The coupling between the two components takes place by means of 10 pawls. Model: SUPERSPORT Outer diameter: 320mm Inner diameter: 80mm Hole diameter: 8.6mm

Brembo T-Drive Pistabassa Front Brake Rotor BMW S 1000 RR

08C86967

Read More

SKU:

Price: ₹100,000.00

Categories: Brake Rotor

Product Description

Brembo T-Drive Pistabassa Front Brake Rotor 08C86967 **Attention, this product refers to the single disc. These discs are interchangeable with the original ones but can only be used with Brembo Racing calipers suitable for use with discs with a thickness of 6 mm or more (not compatible with stock calipers).** Born from the experience gained in SBK and MotoGP, the "T-Drive" disc features a new coupling between belt and bell, consisting of 8 "T" pins on the disk and 8 shapes on the bell that allow the elimination of the pawls of drag. This system guarantees the transmission of braking torque more effectively and improves resistance to thermomechanical stresses. The "T-Drive" system allows both radial and axial flotation and reduces the overall weight of the disc, bringing a consistent advantage in driveability. The band has been optimized both by reducing its height and by redistributing the arrangement of the holes (with differentiated diameters). Even the bell contributes substantially to the final result: made of light alloy by CNC machining, designed to guarantee lightness and rigidity. Technical features: - Assembly as the original - Band height: 320 mm - Band thickness: 6.75 mm - Band Material: Stainless Steel - Bell Material: Aluminum Alloy (Ergal) - Number of holes: 6
