

Brembo Brake Pad Front Honda 1100 Africa Twin

07HO62SA

[Read More](#)

SKU:

Price: ₹3,900.00

Categories: [Brake Pad](#)

Product Description

07HO62SA Product Detail This is a sintered compound, specific for front application, characterized by excellent efficiency in all conditions of use. It therefore represents an ideal alternative to original brake pads, both when cold and when hot. This compound is characterized by low wear which guarantees long life and suitable mileage. 2 brake pads are sold with this set. They will fit 1 caliper. 2 sets are needed for the front wheel

Price: ₹41,000.00

Categories: [Master Cylinder](#)

Product Description

Brembo 110C74010

The 19RCS CORSA CORTA is characterized by the possibility it provides the rider to adapt the braking "bite point" to the desired riding feeling, in addition to the RCS (Ratio Click System), introduced 10 years ago on the Brembo 19RCS radial brake master cylinder, which allows the center distance of the master cylinder to be adjusted to "18" or "20". The master cylinder body is made of forge aluminum alloy, machined with 5-axis CAM technology. A hard oxide coating is used for the surface finish, which guarantees that the master cylinder main body is highly resistant to wear and its components move easily. The floating piston and the seals derive directly from those used in MotoGP, as do the housings for the bleeding and fueling systems, which are inclined by more than 30° to make bleeding the master cylinder easier.

Brembo Series Oro Floating Front Brake Rotor ABS Honda CBR RR 2009-16

78B40876

SKU:

Price: ₹22,500.00

Categories: [Brake Rotor](#)

Product Description

Brembo Series Oro Floating Front Brake Rotor 78B40876 **We remind you that this listing refers to the single rotor. If your bike has two rotor you need to buy two.** Brembo offers with the Gold Series a complete line of rotors that can satisfy any need: perfectly interchangeable with the series rotors , they are the choice of riders who do not want to renounce the Brembo quality. They are composed of the braking strip in stainless steel, connected through 10 pawls to the bell made of aluminum alloy, the latter worked CNC and then anodized. The pawls allow a controlled movement between the band and the bell and allow the materials to dilate when stressed while remaining in the correct operating tolerances.
