### Product Description

Galfer Front Brake Rotor WAVE FLOATING COMPLETE 310x5mm DF351CW The Disc Wave® represents the best example of research and development by Galfer. Laser cut, stainless steel and high carbon content. There is a direct application of competitive technology for any user. Direct replacement system that does not require brackets or any extra parts, it bolts just like a stock disc would. General features: - Lower weight of the unsprung masses. - More braking power. - Better heat dissipation. - Excellent resistance to corrosion. - Less tendency to warp. - Maintains cleaner the contact surface pad-disc. - Improve and personalize the motorcycle esthetic. - Anodized or chromed high resistance aluminium (7075 T6 - 6082 T6) or stainless steel (AISI 420) carrier. All Disc Wave® models with the same original disc size of the motorcycle are certified by TÜV (KBA no. 61147 / 61148). **This item is sold individually. For front tire, a set of 2 rotors are needed. Please add 2 rotors when ordering a full set for the front tire. Set of 2 rotors is Rs 50,000**
