Product Description

Gilles Adjustable Rearsets FXR-BM05-B Color: Black Gearbox type: Standard / Reverse Material: Aluminum Gilles Tooling rear sets deriving directly from the world of SBK. With a slim profile Racing system that faithfully follow the entire contour of the frame. With the footrests you will get a good closure of the knees and legs during the entry, the distance and the exit of the curve. The footpegs are rigid with a high level of grip for the best possible grip. The Gilles Tooling footpegs also offer the possibility of reversing the gearbox in order to provide a unique customization for each riding style. Adjustable up to 6 positions, including the original "0" position, in such a way as to provide the rider with a unique personalization of its kind. Finally, the shift platform can be adjusted to the Racing position where the travel is reduced to speed up the gear change. **NOTE: Inside the package there are the footrests, an instruction manual and all the small parts necessary for correct assembly.**

SKU:

Price: ₹131,500.00

Categories: Rearsets

Product Description

Gilles Adjustable Rearsets MUE2-D01 Color: Black Gearbox type: Standard / Reverse Material: Aluminum A completely new generation of rear set systems. The MUE2 combines

futuristic design with the highest quality workmanship and significantly easier foot plate position adjustment. Black anodized with contrasting color adjusters, which combine sportiness and aggressiveness in a single product. The positions of the footpegs and levers, brake and gearshift, can be freely adjusted according to your personalization criteria. The footrests are positioned using a combination of sliding and rotating adjustments in a single point, making them extremely simple to modify. The footrests also provide the possibility to leave the standard gearbox or to reverse it to satisfy every type of need. The brake and shift levers can be easily adjusted to suit your driving needs. The heel guards are fully carbon on both sides that define the design of the Gilles Tooling rear sets. Attention: For correct installation of the footrests, we recommend contacting a specialized workshop or an experienced and qualified mechanic. **NOTE: Inside the package there are two footrests, an instruction manual and all the small parts necessary for correct assembly.**

SKU:

Price: ₹107,000.00

Categories: Rearsets

Product Description

Gilles Adjustable Rearsets MUE2-S03-B Color: Black Gearbox type: Standard / Reverse Material: Aluminum The new generation of MUE2 footpegs combines a futuristic design with a very high quality of construction, together with a simplified adjustment system. Wide possibility of adjusting the position of the footrest and brake and gear levers. The position of the footrests is given by the combination of the rotation on the fixing pin (5 positions) and the positioning of the pin on a slide (4 positions) for a total of 20 positions. It is possible to choose between standard or reverse shifting only by varying the fastening of the gear shift. The brake and gear levers are mounted on double ball bearings for maximum freedom of movement. Finally, they are equipped with an ergal heel guard on both the brake and gear side.
