Product Description

Gilles Adjustable Rearsets FXR-BM05-B Color: Black Gearbox type: Standard / Reverse Material: Aluminum Gilles Tooling rear sets deriving directly from the world of SBK. With a slim profile Racing system that faithfully follow the entire contour of the frame. With the footrests you will get a good closure of the knees and legs during the entry, the distance and the exit of the curve. The footpegs are rigid with a high level of grip for the best possible grip. The Gilles Tooling footpegs also offer the possibility of reversing the gearbox in order to provide a unique customization for each riding style. Adjustable up to 6 positions, including the original "0" position, in such a way as to provide the rider with a unique personalization of its kind. Finally, the shift platform can be adjusted to the Racing position where the travel is reduced to speed up the gear change. **NOTE: Inside the package there are the footrests, an instruction manual and all the small parts necessary for correct assembly.**
