SKU:

Price: ₹40,000.00

Categories: Throttle Control

Product Description

Jetprime E Wire JP EW 050 The E-Wire kit transforms your bike into a real SBK, transforming the standard digital gas control into a traditional cable control, this type of gas control is used by 90% of the WSBK and MotoGP. The cable also transmits the micro gas openings much better and avoids the involuntary opening on the curbs due to the lack of sensitivity of the digital control. It is possible to adjust the free play and by changing the pulleys it is possible to make it more or less responsive.

Jetprime Racing Quick Throttle Unit Aprilia RS 457

JP ACC 109

Read More

SKU:

Price: ₹47,000.00

Categories: Throttle Control

Product Description

Jetprime Racing Quick Throttle Unit JP ACC 109 This throttle control, result of long studies and tests with the best WSSP 600 and WSBK teams, is entirely designed from scratch. The extraordinary thing about this product is that, despite being completely digital and directly installed on our potentiometer, it gives riders the feeling of a traditional throttle control with steel wire that they like so much, in fact they are still used in MotoGP due to their sensitivity. The throttle has a rotation angle of 60 degrees. As optional, we also developed an integrated handlebar switch line that can be installed directly on our product, without adding bulk to the handlebar. Both throttle control and its additional push buttons panel are Plug and Play and

compatible with all super sport bikes.
