Product Description

Jetprime E Wire JP EW 050 The E-Wire kit transforms your bike into a real SBK, transforming the standard digital gas control into a traditional cable control, this type of gas control is used by 90% of the WSBK and MotoGP. The cable also transmits the micro gas openings much better and avoids the involuntary opening on the curbs due to the lack of sensitivity of the digital control. It is possible to adjust the free play and by changing the pulleys it is possible to make it more or less responsive.

Jetprime Integrated Throttle Control Ducati V4 / S

JP ACC 020S

Product Description

Jetprime Integrated Throttle Control JP ACC 020S Throttle control shell, made of anodized aluminum, with integrated button panel; more robust and lighter than the original control. Each Jet Prime button panel is machined from solid 7075 Aluminum (Ergal) machined through CNC machinery, they are also equipped with IP69K military standard switches that guarantee watertightness and operation that goes beyond a million cycles.
