Rizoma Clear Clutch Cover Kit Black Ducati V4 / V4S

ZDM181B

Read More

SKU:

Price: ₹74,500.00

Categories: Clutch Cover

Product Description

Rizoma Clear Clutch Cover Kit ZDM181B Color: Black The bordless aluminum cover is equipped with a high-tech clear and anti-fog Lexan window, that enables enthusiasts to showcase and admire the beauty of clutch engineering. The internal components have been developed to ensure both aesthetic and technical excellence. The Clutch Vent System, composed by lightweight aluminum pressure plate and pressure ring, is specifically designed for the maximum optimization of the clutch oil circulation inside the cover. In addition, for minimizing moving masses and increasing mechanical strength, Rizoma selected titanium screws for inner parts fastening. For a better purchasing & mounting experience, the clutch cover is sold as a kit, is composed by all the parts needed for the complete replacement of the OEM components, including a pre-assembled pressure plate ball bearing, and has been designed for a Plug and Play quick installation. Kits are composed by: billet aluminum bordless cover with clear Lexan window, billet aluminum pressure plate with pre-assembled ball bearing, billet aluminum pressure ring, (3x) titanium screws for pressure plate and pressure ring fastening, (6x) Nerinox screws for external cover fastening.

Price: ₹49,000.00

Categories: Mirrors

Product Description

Rizoma Stealth Rear View Mirror BSS070B Out of the interface between racing experience and aeronautical inspiration comes a new mirror: Stealth, an accessory specifically designed for supersport bikes. It consists of a fixed part, which allows the fitting directly to the fairing, and a movable part, which acts as a mirror glass holder. Thanks to a rotating system, by a simple movement, the two parts get aligned: in closed position the mirror becomes an aerodynamic foil. While the mirror glass holder is always the same, the fixed component is designed ad hoc for each supersport bikes for which Stealth was developed, looking for the best solution to match the relative aerodynamic results. Made of billet aluminum, it has a convex glass surface to provide a wider viewing angle and is available in three different anodized colors. Stealth's design, with its wing-like shape and 25° angle relative to the ground, give it a linear look, ensure it generates downforce, in turn improving the bike's grip and handling performance, especially at high speed. Downforce pressure is around 4 kg at 300 km/h. The ergonomics has been optimized as well: when the rider takes a sporty riding position, the mirrors are aligned with the rider's eye level. In this way, the rider does not have to raise his position to get a correct rear view, keeping the head protected by the headlight fairing and, therefore, by the pressure that impacts the face at high speed.
