110C74010

Read More

SKU:

Price: ₹41,000.00

Categories: Master Cylinder

Product Description

Brembo 110C74010

The 19RCS CORSA CORTA is characterized by the possibility it provides the rider to adapt the braking "bite point" to the desired riding feeling, in addition to the RCS (Ratio Click System), introduced 10 years ago on the Brembo 19RCS radial brake master cylinder, which allows the center distance of the master cylinder to be adjusted to "18" or "20". The master cylinder body is made of forge aluminum alloy, machined with 5-axis CAM technology. A hard oxide coating is used for the surface finish, which guarantees that the master cylinder main body is highly resistant to wear and its components move easily. The floating piston and the seals derive directly from those used in MotoGP, as do the housings for the bleeding and fueling systems, which are inclined by more than 30° to make bleeding the master cylinder easier.

CNC Racing Evo Bar-end Mirror Pair Aprilia - all models

GB Racing Clutch + Alternator Cover Set EC-RS660-2021-SET-GBR GB Racing products are the

benchmark in high-performance, bolt-on motorcycle protection for the short circuit, road racing and street bike community and the only manufacturer of motorcycle protection to have received FIM product approval, a mark of quality carried since 2009. This has now been renewed for 2021 through to 2023 on our range of bolt-on secondary engine covers. Championships cover IDM, AMA, CIV, IDM, FFM EWC, BSB, WSBK, MotoGP and more.

Healtech Exhaust Servo Eliminator Aprilia RSV4 (2021-24)

HT-ESE-A04

Read More

SKU:

Price: ₹6,900.00

Categories: Electronics

Product Description

Healtech Exhaust Servo Eliminator HT-ESE-A04 Many bikes are equipped with exhaust valve controlled by servo motor. When making performance changes involving the replacement of the exhaust or the installation of an additional control unit, it is necessary the elimination of the exhaust valve. This can however lead to problems such as reports of errors in the control unit - with the consequent ignition of spies and, sometimes, the entry into operation of electronic security mechanisms that involve the reduction of engine performance. HealTech thought to preparatory and enthusiasts that collide with these problems realizing the ESE (Exhaust Servo Eliminator - excluder exhaust valve). Reduced weight (24 grams) and size (30x20x13 mm) encloses a microprocessor that ensures optimum performance and compatibility with different systems.

Healtech Pair System Eliminator Aprilia RS 660 (2020-24)

HT-PSE-01

Read More

SKU:

Price: ₹3,800.00

Categories: Electronics

Product Description

Healtech Pair System Eliminator HT-PSE-01 The PAIR system on modern sport and street bikes injects fresh air to the exhaust. Doing so, it minimizes the amount of unburnt fuel getting to the atmosphere. This is why the popping occurs on heavy deceleration, as the unburnt fuel is combusting in the end can. Whether you just simply want to get rid of the popping, or opting for a dyno tune, the PAIR system is in your way. However, disconnecting the PAIR valve from the bike’s main harness will instantly result in the FI light coming on (which could mask some serious bike/engine related faults). The PS Eliminator will do the trick in a blink of an eye – just plug it in to the PAIR valve’s connector and you’re all set!

Product Description

Jetprime Race Kill Switch JP KS 660 Jetprime Kill Switch has the function of replacing the key lock on motorbikes for racing use. It is supplied in combination with the Key Box where the original motorcycle key is housed together with its antenna. In this way you will no longer need to use the original key and lock, with a saving of approximately 350 grams (depending on the models).

Jetprime Racing Quick Throttle Unit Aprilia RS 457

JP ACC 109

Read More

SKU:

Price: ₹47,000.00

Categories: Throttle Control

Product Description

Jetprime Racing Quick Throttle Unit JP ACC 109 This throttle control, result of long studies and tests with the best WSSP 600 and WSBK teams, is entirely designed from scratch. The extraordinary thing about this product is that, despite being completely digital and directly installed on our potentiometer, it gives riders the feeling of a traditional throttle control with steel wire that they like so much, in fact they are still used in MotoGP due to their sensitivity. The throttle has a rotation angle of 60 degrees. As optional, we also developed an integrated handlebar switch line that can be installed directly on our product, without adding bulk to the handlebar. Both throttle control and its additional push buttons panel are Plug and Play and compatible with all super sport bikes.

Lightech Gloss Carbon Fiber Universal Brake Caliper Cooling Ducts - all Aprilia radial caliper models

CAR007

Read More

SKU:

Price: ₹24,000.00

Categories: Carbon Fiber

Product Description

Lightech Gloss Carbon Fiber Universal Brake Caliper Cooling Ducts CAR007 Lightech carbon fiber is manufactured in Italy, lighter than OEM standard parts, fitted to a beautiful gloss carbon finish, and is UV resistant. emperature buildup caused from fast road and on track usage has always been hard work for front brake systems. This causes fade and reduces both the effectiveness and feel at the lever. The cooling ducts force air into the brake caliper and keep the pistons, and pads cool, allowing more longevity for the pads and caliper.

Product Description

Hammer Enduro E MX Hand Guard & Handlebar Mounting System

Hammer is the new model on Polisport's handguards line with 1-point-mount, for MX and Enduro. With it comes a new universal mounting system developed for simple and quick installation and a perfect fit on crowded handlebars. The HAMMER offers a large plastic shape to protect hands and master cylinder, and 2 positions of horizontal adjustment to allow some level of customization when installed. The minimalist design, with horizontal oriented vents and carbon texturized plastic cover, will match your bike and give it a stylish look. Hammer handguard is available in Black.

Features

- New universal mounting system for quick, easier mounting and a perfect fit
- Large plastic guard to ensure the optimal protection for hands and master cylinder
- Slim and low-profile
- Horizontally orientated airflow vents for better cooling
- Quick and easy installation
- Mounting system bolted on the front of the plastic guard for easy installation and removal
- Adjustable horizontally in 2 positions
- All hardware included
- Mounting kit provides a wider range of installation on the handlebar

Rizoma Stealth Rear View Mirror Pair Black Aprilia RSV4

BSS070B
Read More

SKU:

Price: ₹49,000.00

Categories: Mirrors

Product Description

Rizoma Stealth Rear View Mirror BSS070B Out of the interface between racing experience and aeronautical inspiration comes a new mirror: Stealth, an accessory specifically designed for supersport bikes. It consists of a fixed part, which allows the fitting directly to the fairing, and a movable part, which acts as a mirror glass holder. Thanks to a rotating system, by a simple movement, the two parts get aligned: in closed position the mirror becomes an aerodynamic foil. While the mirror glass holder is always the same, the fixed component is designed ad hoc for each supersport bikes for which Stealth was developed, looking for the best solution to match the relative aerodynamic results. Made of billet aluminum, it has a convex glass surface to provide a wider viewing angle and is available in three different anodized colors. Stealth's design, with its wing-like shape and 25° angle relative to the ground, give it a linear look, ensure it generates downforce, in turn improving the bike's grip and handling performance, especially at high speed. Downforce pressure is around 4 kg at 300 km/h. The ergonomics has been optimized as well: when the rider takes a sporty riding position, the mirrors are aligned with the rider's eye level. In this way, the rider does not have to raise his position to get a

correct rear view, keeping the head protected by the headlight fairing and, therefore, by the pressure that impacts the face at high speed.
