## Puig Frontal Spoiler Black BMW S 1000 RR

20522N

[Read More](#)

**SKU:**

**Price:** ₹32,000.00

**Categories:** [Winglets](#)

### Product Description

**Puig Frontal Spoiler Black 20522N** Reinforce the Racing aesthetics and improve the aerodynamics of your motorcycle with the new frontal spoiler GP from Puig. The new GP spoiler is the result of the most advanced knowledge and technologies in the field of competition motorcycling, and has been designed and manufactured entirely in Barcelona. The GP front spoiler for the BMW S1000RR has been specially designed to enhance your BMW with the most advanced technology in the field of aerodynamics, a direct legacy of high competition such as the MotoGP world championship. Entirely designed and manufactured in Barcelona under the latest technology, the GP front spoiler is made of high-quality 4mm PMMA, a material highly resistant to impacts, splashes and UV. Its special design guarantees maximum safety thanks to the 2mm radius rounded edges. Puig offers the possibility of customizing the spoilers, being able to choose from a wide range of colors. And if the customer wishes, the Puig adhesive kit can be added, which includes the product in the colors blue and red. The piece is easily assembled, no more than 15 minutes, and does not require specific mechanical knowledge or special tools. Fixing through small metal supports and rubber pieces designed by the house. It does not require drilling the original fairing of the motorcycle. There are many benefits that the spoiler produces on your motorcycle, among which +7.8 Kg of Downforce on the front axle, anti-shimmie effect at high speeds and anti-wheelie effect stand out. We can also enjoy greater stability in changes of direction.

## Rizoma Stealth Rear View Mirror Pair Black BMW S 1000 RR

BSS010B

[Read More](#)

**SKU:**

**Price:** ₹49,000.00

**Categories:** [Mirrors](#)

### Product Description

Rizoma Stealth Rear View Mirror BSS010B Out of the interface between racing experience and aeronautical inspiration comes a new mirror: Stealth, an accessory specifically designed for supersport bikes. It consists of a fixed part, which allows the fitting directly to the fairing, and a movable part, which acts as a mirror glass holder. Thanks to a rotating system, by a simple movement, the two parts get aligned: in closed position the mirror becomes an aerodynamic foil. While the mirror glass holder is always the same, the fixed component is designed ad hoc for each supersport bike for which Stealth was developed, looking for the best solution to match the relative aerodynamic results. Made of billet aluminum, it has a convex glass surface

to provide a wider viewing angle and is available in three different anodized colors. Stealth's design, with its wing-like shape and 25° angle relative to the ground, give it a linear look, ensure it generates downforce, in turn improving the bike's grip and handling performance, especially at high speed. Downforce pressure is around 4 kg at 300 km/h. The ergonomics has been optimized as well: when the rider takes a sporty riding position, the mirrors are aligned with the rider's eye level. In this way, the rider does not have to raise his position to get a correct rear view, keeping the head protected by the headlight fairing and, therefore, by the pressure that impacts the face at high speed.
