AE-58002

[Read More](#)

SKU:

Price: ₹22,500.00

Categories: [Brake / Clutch Lever](#)

Product Description

Aella Aluminum Billet Brake Lever
AE-58002

Presenting a rare and unique brake lever that is only seen on the WSBK and MotoGP bikes. This unique brake lever is hand built in Japan for race teams and is only available through Aella. Adopting aluminum contributes to weight reduction and improved looks, while the AELLA logo is engraved on the left side with a laser to casually appeal the brand. Fully adjustable lever allows more play for better braking control and the lever folds up in case of a fall or drop. This is a unique product that is being offered for the first time in India through Lanesplit, Aella's brand partner.

Rizoma Stealth Rear View Mirror Pair Black Ducati V2

BSS040B

[Read More](#)

SKU:

Price: ₹49,000.00

Categories: [Mirrors](#)

Product Description

Rizoma Stealth Rear View Mirror BSS040B Out of the interface between racing experience and aeronautical inspiration comes a new mirror: Stealth, an accessory specifically designed for supersport bikes. It consists of a fixed part, which allows the fitting directly to the fairing, and a movable part, which acts as a mirror glass holder. Thanks to a rotating system, by a simple movement, the two parts get aligned: in closed position the mirror becomes an aerodynamic foil. While the mirror glass holder is always the same, the fixed component is designed ad hoc for each supersport bikes for which Stealth was developed, looking for the best solution to match the relative aerodynamic results. Made of billet aluminum, it has a convex glass surface to provide a wider viewing angle and is available in three different anodized colors. Stealth's design, with its wing-like shape and 25° angle relative to the ground, give it a linear look, ensure it generates downforce, in turn improving the bike's grip and handling performance, especially at high speed. Downforce pressure is around 4 kg at 300 km/h. The ergonomics has been optimized as well: when the rider takes a sporty riding position, the mirrors are aligned with the rider's eye level. In this way, the rider does not have to raise his position to get a correct rear view, keeping the head protected by the headlight fairing and, therefore, by the pressure that impacts the face at high speed.

Rizoma Stealth Rear View Mirror BSS040D Out of the interface between racing experience and aeronautical inspiration comes a new mirror: Stealth, an accessory specifically designed for supersport bikes. It consists of a fixed part, which allows the fitting directly to the fairing, and a movable part, which acts as a mirror glass holder. Thanks to a rotating system, by a simple movement, the two parts get aligned: in closed position the mirror becomes an aerodynamic foil. While the mirror glass holder is always the same, the fixed component is designed ad hoc for each supersport bikes for which Stealth was developed, looking for the best solution to

match the relative aerodynamic results. Made of billet aluminum, it has a convex glass surface to provide a wider viewing angle and is available in three different anodized colors. Stealth's design, with its wing-like shape and 25° angle relative to the ground, give it a linear look, ensure it generates downforce, in turn improving the bike's grip and handling performance, especially at high speed. Downforce pressure is around 4 kg at 300 km/h. The ergonomics has been optimized as well: when the rider takes a sporty riding position, the mirrors are aligned with the rider's eye level. In this way, the rider does not have to raise his position to get a correct rear view, keeping the head protected by the headlight fairing and, therefore, by the pressure that impacts the face at high speed.

WRS Lighthouse Lens Protector Ducati DesertX

DU027T

[Read More](#)

SKU:

Price: ₹8,100.00

Categories: [Protectors](#)

Product Description

WRS Lighthouse Lens Protector DU027T This lens was born from the need to protect the headlight from gravel and external agents while driving. It is simple to apply on the bike, no modifications are required for correct assembly. In addition to being easily removable, it is the only one made with shockproof material. Thanks to its small size, it fits perfectly with the lines of the bike, making it even more sporty and captivating. Mounting brackets are included in the package. As for the screws, the original is reused.
