### Product Description

Alpinestars 2023 Faster-3 Rideknit Shoes Featuring new performance innovations adapted from decades of R&D experience in the highest level of motorsports, the Faster-3 Shoe incorporates class-leading protective features, both inside and outside. The Faster-3 Shoe is constructed from a lightweight, durable microfiber chassis and com-fort-giving interior mesh, resulting in an aggressively styled road racing shoe offering performance, precision, flexibility and structural integrity. • Enhanced TPU ankle extended in lower lateral area increases support and protection. • TPR slider details on lateral toe box gives enhanced flex and protection. • Asymmetric toe design gives protection on shift area. • Traditional lace closure system for an easy, secure and comfortable fit. • Lateral adjustable hook and loop closure system with TPR strap for added security. • Medial dual density ankle protectors between the upper padded lining to provide strategic protection and flexibility in key areas. • Tongue and collar padding provides high levels of comfort and an excellent fit around the ankle and instep. • Internal toe box and heel counter reinforcement is layered under the upper for a more ergonomic design. • Extremely lightweight, specifically compounded rubber sole provides textured grip, superb absorption and features an integrated support shank for enhanced sole rigidity. • Upper constructed from a superbly lightweight, durable and abrasion-resistance microfiber. • Replaceable anatomical EVA footbed with Lycra lining on top. • 3D mesh lining for excellent breathability with anti-slip micro-suede on heel. • New TPR heel counter design ensures additional lateral support and security. • According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: CE EN13634:2017.

## Product Description

Alpinestars CR-X Drystar Black / Dark Blue / Yellow Fluorescent Shoes Shoes designed to be worn both on the bike as well as for urban activities or walking in the mountain. Incorporating a waterproof and breathable Drystar membrane, protectors on the ankles, and strategically placed reinforcements. The CR-X provide a snug fit and ample internal volume to offer excellent comfort. **Construction**

- Made of an advanced PU (polyurethane) open cell composite; provides high levels of breathability.
- Interior with a minimalist design that provides greater lightness and excellent comfort and fit.
- Front area with flexible inserts for greater comfort when walking.
- Drystar membrane (100% waterproof and breathable) subtly integrated into the chassis.
- Strap with Velcro® for a quick and secure closure.
- Quick Lacing system derived from the technology developed by Alpinestars in Formula 1, which provides high levels of precision in the fit and fantastic comfort, strategically wrapping the foot for great support.
- Tongue designed to offer high levels of comfort and fit.
- Protective PU foam open-cell discs in the ankles positioned under the outer layer. They offer excellent protection at a key point.
- Rubber toe reinforcement to offer high levels of abrasion resistance.
- Reinforcement in the area of the shifter guard for greater durability.
- Replaceable PU Ortholite open-cell insole; provides excellent levels of comfort.
- EVA insert between the interior and exterior material to reduce the pressure in the shifter area.

- Dual compound, oil resistant rubber sole. Offers high levels of abrasion resistance.
- Outsole of asymmetric design to offer excellent levels of grip and resistance to abrasion.
- Full length plate (CE certified) for increased protection and comfort.
- The Alpinestars CR-X Drystar shoes are CE certified in accordance with standard EN 13634 : 2017.

### Product Description

Alpinestars Faster 3 Drystar Shoes Shoes with an aggressive design with a breathable and waterproof Drystar membrane. Incorporating protectors in the ankles, reinforcements, and strategically located padding and an improved closure. These shoes stand out for being very comfortable and light. With CE certification. **Construction**

- Upper made in a combination of microfiber, PU suede and seamless, thermowelded microfiber; affording high levels of durability and abrasion resistance.

### Technical Innovations

- One piece strap with Velcro® on the instep for a quick, secure and custom closure.

- Lace closure that provides high levels of fit and fantastic comfort.
- TPR lateral slider on the outside of the toes with a renewed design; affords improved feel and sensitivity to the motorbike control, as well as greater abrasion resistance.
- Innovative heel compartment with a rounded and ergonomic design, made of polypropylene; affording support, protection and stability.
- Sole made of a lightweight rubber composite with textured tread pattern; provides high levels of grip, support and stability.
- Extended TPR insert in the lower front side for greater protection against abrasion and impacts.
- Toebox with asymmetric design to offer greater protection in the shifter area.

### Features and fit

- 100% waterproof and breathable Drystar membrane, that provides excellent performance under any weather condition.
- Mesh inserts on the side for superb breathability and ventilation.
- High performance padding on tongue and collar provides high levels of comfort and fit around the ankle and instep.
- Dual density ankle protector in the medial area situated under the surface; affords protection and flexibility.
- Internal toe box and heel counter have reinforcements located under the top layer for a more ergonomic design.
- Removable and replaceable anatomical EVA foot-bed with Lycra lining; affords comfort, support and superb moisture wicking.
- The Alpinestars Faster-3 Drystar shoes are CE certified in accordance with EN 13634 : 2017.

**SKU:**

**Price:** ₹10,280.00

**Categories:** [Riding Shoes](#)

## Product Description

Alpinestars Smx-1 R V2 Vented Boots **\*Price reflects 50% deposit amount and not the full price. Includes shipping** A class-leading, low-cut performance riding boot, the SM-1 R V2 Vented Riding Shoe incorporates a host of technical innovations for improved levels of comfort,

fit and durability. Constructed from a lightweight and abrasion-resistant microfiber upper with extensive perforations for maximum airflow and breathability, the shoe is also equipped with strategically positioned TPU protectors for abrasion resistance in a key area. The SMX-1 R V2 Vented Riding Shoe also features a rubber compound sole with superior grip patterning for excellent grip both on and off the bike, while the accordion flex zones give support and control regardless of your riding position. Main upper constructed from an advanced microfiber for comfort, durability and excellent of abrasion resistance. Extensive perforations throughout for maximum airflow, with a front bellow constructed from textile material for enhanced breathability. Innovative heel counter support system, which works in conjunction with a strap closure to offer improved fit and support, as well as structural integrity. Rear of heel counter has been designed with soft TPR insert which works seamlessly with the rear flex zone to allow for improved freedom of ankle movement and comfort on the bike's controls. Rear flex bellow is equipped with a flex window, which also acts as an air intake for effective ventilation and airflow. New ergonomic TPU shift pad for enhanced durability in a critical area. Alpinestars exclusive compound rubber sole with grip patterning to promote improved feel and grip, water dispersion and durability. Sole features integrated [Alpinestars](#) TPF (Transversal protection Frame) to protect against possible transversal loads. Instep and Achilles' accordion flex zones are constructed from lightweight microfiber for optimized levels of durability, comfort and maneuverability on and off the bike. Thermowelded flex grooves to control the flexion and flexibility of the shoe; instep, medial and back. Reverse zip closure ensures convenient in and out. According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: CE EN13634:2017. External, high modulus TPU heel counter, lateral ankle and shift pad for improved shock protection and durability. Internal toe box protection is layered under the upper for durability, improved feel and performance. Double density ankle protector on both sides layered under the upper offers protective performance and abrasion resistance in key area. Integrated, replaceable bi-injected TPU forefoot slider features new easy-screw fixing concept for quicker and easier replacement. Removable anatomic foot-bed includes EVA foam and Lycra® for comfort and support. Internal mesh lining for cooling comfort and moisture-wicking. Ergonomic boot shaping for forefoot streamlining which offers wide-ranging foot profile fit and comfort. Evolved closure strap is anatomically angled to follow natural shape of rider's instep. Front Velcro® closure system offers a quick and secure fit over the instep area while permitting excellent levels of flex. Strap features TPR puller for ease of use. Aramidic fiber wires ensure the new strap closure system is durable, thin and lightweight.

**SKU:**

**Price:** ₹22,000.00

**Categories:** [Riding Shoes](#)

### Product Description

Xpd Xp-9 R Air Boots White **\*Price reflected is the deposit required to order the product\***  
Total price of the item is **INR 44,240 + shipping** Product cannot be ordered without explicit approval from Lanesplit. Please contact us for order enquiry. The XP9-R boot is ideal for high-level competitive use thanks to the grade 2 abrasion and cut resistance of the upper with CE EN 13634:2017 Certificate. Safety at the most adrenaline-pumping speeds is guaranteed by many aspects: the shock absorber structure in polyurethane with programmed deformation, the neoprene gaiter for a watertight closure and the Air Tech insole for perspiration dissipation are just some of these. The best of Xpd technology for high-level competitive use. CE certified EN 13634:2017 level 2 upper abrasion resistance and level 2 upper cut resistance. External material 1.55 mm thick high resistance microfibre. Inner side of the boot in 1.55 mm thick Suede microfiber. Shock absorber structure in polyurethane with programmed deformation on the external side, front and rear tibia and heel. Gearbox guard and aerodynamic rear fin in polyurethane shock absorber Removable curb and heel slider in acetal resin. Neoprene gaiter: creates a watertight closure of the boot in the upper part, prevents the passage of dust and objects inside the boot. Zip opening on the outside. Ventilation on heel and shin. Magnesium sliders. Air Tech insole that favors the dissipation of perspiration. Anti-intrusion and anti-compression Nylon insole. Vulcanized rubber sole with racing mapping with pro slider rounded profile. Inclined internal heel for perfect adhesion to the motorcycle footrest. Removable AGS3 inner boot: it is a biomechanical protection device. Closure with micrometric adjustment lever and quick release.
