Product Description

Domino Hand Grip A01041C4840B7-0 Domino produces a wide variety of grips for its own controls, designed for handlebars with diameter of 22 and 25.4 mm, for a range of motorcycles. Why use Domino? It is vital to know the precise feel of your throttle control, which allows tiny hand movements to channel the exact power you want from your motorbike. Domino is second to none in the art of motorcycle controls. This is why most European motorcycle manufactures choose Domino as original equipment.
