

Bonamici Adjustable Rearsets BMW S 1000 RR

B007

[Read More](#)

SKU:

Price: ₹75,000.00

Categories: [Rearsets](#)

Product Description

Bonamici Adjustable Rearsets B007 The rearsets are made entirely from solid material using numerical control machines (CNC) with 3D technology. The use of return springs integrates in the balls and bearings a sphere in place of the bronze bushes, completing the work by manufacturing an excellent product that also offers the most demanding pilots. These platforms can operate with normal and inverted (GP Shifter) gearboxes. Technical features:

- Possibility of adjustment in various positions
- Integrated brake lever return spring
- Off-center for millimeter adjustment of the brake lever position
- Adjustment of the pin point lever to change the millimeter
- Black anodizing
- Rubber toe cap
- Non-slip footrest

Product Description

Bonamici Adjustable Rearsets DV4 The rearsets are made entirely from solid material using numerical control machines (CNC) with 3D technology. The use of return springs integrates in the balls and bearings a sphere in place of the bronze bushes, completing the work by manufacturing an excellent product that also offers the most demanding pilots. These platforms can operate with normal and inverted (GP Shifter) gearboxes. Technical features:

- Rearsets made of high strength aluminum alloy
- Double ball bearings on each linkage to completely eliminate friction
- Return spring on the brake lever
- Black anodizing for greater mechanical and chemical resistance
- Possibility of customization with different accessories
- 100% made in Italy
- 6 position adjustment
- Rearsets for both normal and reverse shifting
- Possible to mount carbon heel plates accessories

Bonamici Adjustable Rearsets Suzuki GSX 8R

S014

[Read More](#)

SKU:

Price: ₹57,000.00

Categories: [Rearsets](#)

Product Description

Bonamici Adjustable Rearsets S014 The new Suzuki GSX-8R is an exciting fully-faired sportbike built on the foundation of the GSX-8R. Bonamici Racing is thrilled to introduce the new S014 rearset kit, designed to enhance the riding experience on both models. The adjustable S014 kit supports both standard and reverse shifting, providing riders with unparalleled precision, flexibility and control. **Technical features:** - Rearsets made of high strength aluminum alloy - Double ball bearings on each linkage to completely eliminate friction - Return spring on the brake lever - Black anodizing for greater mechanical and chemical resistance - Possibility of customization with different accessories and colors. - 12 position foot-peg adjustment - Rearsets for both Standard and Reverse shifting - Gear Spacer Support purchasable separately (to remove side stand) - It is necessary to fit the hydro-stop code HD125 to reuse the rear brake light - Spare Parts always available - Bolts and Nuts supplied with each item for perfect installation - 100% made in Italy **Rearsets kit with adjustable foot-peg and toe peg system** The new S014 rearset kit offers a versatile solution for every rider as both the foot-peg and the gear and brake lever peg are adjustable. S014 allows individual adjustment of various parameters such as foot-peg height, shift travel and pedal length to ensure an optimal driving experience. As with all Bonamici rearsets, these adjustments offer the ability to configure your motorcycle according to your personal preferences or needs. **CNC machined for ultra light weight** Our S014 rearset kit is designed and developed through manufacturing that not only reduces weight but also improves structural integrity. The complex CNC machining process allows the improvement of the agility and maneuverability of the motorcycle without compromising robustness. **Material: Mix of high-strength aluminum alloys** The use of

different aluminum alloys in the components of an adjustable rearset kit for sports motorcycles is driven by the need to optimize mechanical performance, workability, corrosion resistance, weight and costs. Selecting the right alloy for each component is critical to ensuring the kit as a whole offers the best possible performance, durability and safety for riders. **Weight** At just 0.575 grams on the gear side and 0.505 grams on the brake side, our rearset kit minimizes unnecessary weight and maximizes performance. More rigidity and 80% reduced torsion.

Replacement (repair) parts For all our rearset kits it's possible to obtain all individual parts. Each component is supplied with bolt/nut for its correct installation. In the assembly instructions there is a spare parts list to easily identify the parts to be replaced, each component has its specific code. **Track use** For use on the circuits of the new S014 rearset kit, it is possible to remove the side stand and install the gear spacer support, code DC_043B, in its place. DC_043B is not included with the code S014 but it is purchasable separately.

SKU:

Price: ₹76,000.00

Categories: [Rearsets](#)

Product Description

Extreme Components Adjustable Rearsets PED-GP EVO ZX1016 LCD ZX10 16B Color: Black
Gearbox type: Standard Thanks to the use of premium aluminum alloy and centesimal accuracy processes, the new rearsets are lighter (from 8% to 10% depending of the model) then our previous one, but maintaining the same torque resistance. Breaking points are predetermined thanks to the use of a specific software. Thanks to the use of new CNC machines, the new rearsets are totally machined from solid (lines of 0,8 mm) using 3D technology. The new hard anodization system makes the parts glossy and shiny and guarantee a better durability. The brake and shift levers are fully mounted on ball bearings in specific steel bushing to guarantee the best precision and long durability and now are supplied of a slide to have a micrometrical regulation of the front toe pegs and permit to the rider to find the best position on the motorbike. Both the front toe pegs (brake and shift) are now made in rubber to guarantee a better comfort and better grip as well. Technical features: - Lightweight - Machined from solid

billet aluminum - Standard shifting - Plug & play - Micrometrical regulation of the toe pegs - Brake / shift toe pegs in rubber to guarantee a great comfort and grip as well - Predetermined breaking points in case of crash (to limit/avoid the risk of frame's damage) - Fully mounted on ball bearings in specific steel bushing - Hard anodized with shiny treatment

SKU:

Price: ₹87,500.00

Categories: [Rearsets](#)

Product Description

Gilles Adjustable Rearsets FXR-BM05-B Color: Black Gearbox type: Standard / Reverse
Material: Aluminum Gilles Tooling rear sets deriving directly from the world of SBK. With a slim profile Racing system that faithfully follow the entire contour of the frame. With the footrests you will get a good closure of the knees and legs during the entry, the distance and the exit of the curve. The footpegs are rigid with a high level of grip for the best possible grip. The Gilles Tooling footpegs also offer the possibility of reversing the gearbox in order to provide a unique customization for each riding style. Adjustable up to 6 positions, including the original "0" position, in such a way as to provide the rider with a unique personalization of its kind. Finally, the shift platform can be adjusted to the Racing position where the travel is reduced to speed up the gear change. **NOTE: Inside the package there are the footrests, an instruction manual and all the small parts necessary for correct assembly.**

MUE2-D01

[Read More](#)

SKU:

Price: ₹131,500.00

Categories: [Rearsets](#)

Product Description

Gilles Adjustable Rearsets MUE2-D01 Color: Black Gearbox type: Standard / Reverse
Material: Aluminum A completely new generation of rear set systems. The MUE2 combines futuristic design with the highest quality workmanship and significantly easier foot plate

position adjustment. Black anodized with contrasting color adjusters, which combine sportiness and aggressiveness in a single product. The positions of the footpegs and levers, brake and gearshift, can be freely adjusted according to your personalization criteria. The footrests are positioned using a combination of sliding and rotating adjustments in a single point, making them extremely simple to modify. The footrests also provide the possibility to leave the standard gearbox or to reverse it to satisfy every type of need. The brake and shift levers can be easily adjusted to suit your driving needs. The heel guards are fully carbon on both sides that define the design of the Gilles Tooling rear sets. Attention: For correct installation of the footrests, we recommend contacting a specialized workshop or an experienced and qualified mechanic. **NOTE: Inside the package there are two footrests, an instruction manual and all the small parts necessary for correct assembly.**

Gilles Adjustable Rearsets Suzuki Hayabusa Gen 3

MUE2-S03-B

[Read More](#)

SKU:

Price: ₹107,000.00

Categories: [Rearsets](#)

Product Description

Gilles Adjustable Rearsets MUE2-S03-B Color: Black Gearbox type: Standard / Reverse
Material: Aluminum The new generation of MUE2 footpegs combines a futuristic design with a very high quality of construction, together with a simplified adjustment system. Wide possibility of adjusting the position of the footrest and brake and gear levers. The position of the footrests is given by the combination of the rotation on the fixing pin (5 positions) and the positioning of the pin on a slide (4 positions) for a total of 20 positions. It is possible to choose between standard or reverse shifting only by varying the fastening of the gear shift. The brake and gear levers are mounted on double ball bearings for maximum freedom of movement. Finally, they are equipped with an ergal heel guard on both the brake and gear side.
