Product Description

Aella Aluminum Billet Brake Lever

AE-58002

Presenting a rare and unique brake lever that is only seen on the WSBK and MotoGP bikes. This unique brake lever is hand built in Japan for race teams and is only available through Aella. Adopting aluminum contributes to weight reduction and improved looks, while the AELLA logo is engraved on the left side with a laser to casually appeal the brand. Fully adjustable lever allows more play for better braking control and the lever folds up in case of a fall or drop. This is an unique product that is being offered for the first time in India through Lanesplit, Aella's brand partner.
