Product Description

Aella Aluminum Billet Clutch Lever

AE-59002

Presenting a rare and unique clutch lever that is only seen on the WSBK and MotoGP bikes. This unique clutch lever is hand built in Japan for race teams and is only available through Aella. Adopting aluminum contributes to weight reduction and improved looks, while the AELLA logo is engraved on the right side with a laser to casually appeal the brand. Fully adjustable lever allows more play for better clutch control and the lever folds up in case of a fall or drop. This is an unique product that is being offered for the first time in India through Lanesplit, Aella's brand partner.
