Product Description

Gilles Adjustable Rearsets MUE2-S03-B Color: Black Gearbox type: Standard / Reverse

Material: Aluminum The new generation of MUE2 footpegs combines a futuristic design with a very high quality of construction, together with a simplified adjustment system. Wide possibility of adjusting the position of the footrest and brake and gear levers. The position of the footrests is given by the combination of the rotation on the fixing pin (5 positions) and the positioning of the pin on a slide (4 positions) for a total of 20 positions. It is possible to choose between standard or reverse shifting only by varying the fastening of the gear shift. The brake and gear levers are mounted on double ball bearings for maximum freedom of movement. Finally, they are equipped with an ergal heel guard on both the brake and gear side.
