Product Description

HP Corse SP-3 Carbon 350 Satin Steel Exhaust Slip On TRT850SP3350S-AB Material: Silencer in satin stainless steel with carbon cap SPS CARBON derives from the 4-TRACK R (with DBK) from which it differs only aesthetically for the use of the carbon fiber end cap that wraps the hydroformed internal spout. SPS CARBON is dedicated to Maxi Enduro, Sport Touring / Adventure and latest generation crossovers. SPS CARBON loves the thrill of large spaces and roads that are lost beyond the horizon. Conceived in the R&D Center of Bologna, the new HP CORSE creature is born strong, capable of withstanding the most demanding situations and the many kilometers traveled to accompany you through roads, paths, mountain passes and deserts from all over the world. Tested for over a year on the dyno and on the most demanding routes, SPS CARBON guarantees reliability and better performance than all the original exhausts that it replaces, particularly at low and medium revs. SPS CARBON is light, has octagonal shaped bottoms, a hydroformed classic style internal spout wrapped in a beautiful carbon fiber end cap and a silencer body with laser engraved logo. Available in three different materials: titanium, satin steel, black ceramic steel.
