Product Description

LighTech Mirror Block-off Plates SPE127ROS

The LighTech mirror block-off plates perfectly cover the holes of the original mirrors when they are removed, in a very elegant and harmonious way. They are produced in an aluminum alloy, which combines long-term resistance with the lightness sought by pilots when riding. They are also ideal for use on the track without mirrors. To make the product more authentic and original, the LighTech logo is laser engraved on each mirror cap. The shape of each mirror cap changes to better adapt to the design of the motorcycle. The screws for installing the product are included in the package.
