Total price of the item is **INR 44,240 + shipping** Product cannot be ordered without explicit approval from Lanesplit. Please contact us for order enquiry. The XP9-R boot is ideal for high-level competitive use thanks to the grade 2 abrasion and cut resistance of the upper with CE EN 13634:2017 Certificate. Safety at the most adrenaline-pumping speeds is guaranteed by many aspects: the shock absorber structure in polyurethane with programmed deformation, the neoprene gaiter for a watertight closure and the Air Tech insole for perspiration dissipation are just some of these. The best of Xpd technology for high-level competitive use. CE certified EN 13634:2017 level 2 upper abrasion resistance and level 2 upper cut resistance. External material 1.55 mm thick high resistance microfibre. Inner side of the boot in 1.55 mm thick Suede microfiber. Shock absorber structure in polyurethane with programmed deformation on the external side, front and rear tibia and heel. Gearbox guard and aerodynamic rear fin in polyurethane shock absorber Removable curb and heel slider in acetal resin. Neoprene gaiter: creates a watertight closure of the boot in the upper part, prevents the passage of dust and objects inside the boot. Zip opening on the outside. Ventilation on heel and shin. Magnesium sliders. Air Tech insole that favors the dissipation of perspiration. Anti-intrusion and anti-compression Nylon insole. Vulcanized rubber sole with racing mapping with pro slider rounded profile. Inclined internal heel for perfect adhesion to the motorcycle footrest. Removable AGS3 inner boot: it is a biomechanical protection device. Closure with micrometric adjustment lever and quick release.
