Product Description

Aella Aluminum Billet Brake Lever
AE-58005

Presenting a rare and unique brake lever that is only seen on the WSBK and MotoGP bikes. This unique brake lever is hand built in Japan for race teams and is only available through Aella. Adopting aluminum contributes to weight reduction and improved looks, while the AELLA logo is engraved on the left side with a laser to casually appeal the brand. Fully adjustable lever allows more play for better braking control and the lever folds up in case of a fall or drop. This is a unique product that is being offered for the first time in India through Lanesplit, Aella's brand partner.

Aella Carbon Fiber Smoked Windscreen AS-006-10-04

Presenting a rare and unique windscreen that is only seen on the WSBK and MotoGP bikes. This unique windscreen is hand built in Japan for race teams and is only available through Aella. Adopting dry carbon trim contributes to weight reduction and improved looks, while the screen is made of specially processed acrylic with excellent scratch resistance, and has excellent visibility without distortion. The AELLA logo is engraved on the right side with a laser to casually appeal the brand. This is an unique product that is being offered for the first time in India through Lanesplit, Aella's brand partner.

Aella Frame Slider BMW S 1000 RR (19-22 models)

AE-68129

[Read More](#)

SKU:

Price: ₹22,500.00

Categories: [Frame Slider](#)

Product Description

Aella Frame Slider AE-68129 Japan's most famous accessories and special parts company has teamed up with Lanesplit. Introducing Aella's frame sliders for the BMW S 1000 RR. These are hand crafted in Japan. In the case of a conventional slider due to the shape of the frame, the left and right mounting heights will differ, but the new design has been made so that they are almost the same height. AELLA's unique taper shape makes it less likely to stick out, and the slider functions well while maintaining a clean impression. The frame slider suppresses damage caused by unexpected falls. Since the frame of the new S1000RR is thin, if the force at the time of falling is transmitted directly to the frame, it may be damaged more than expected. Therefore, the right side adopts a new mechanism that releases the force applied during the fall. Furthermore, "heat-resistant bump rubber" is installed on both sides of the slider to avoid contact with the frame. Install the left side away from the mounting position and distribute the force at the time of the fall at the slider base. In addition, the "heat-resistant bush rubber" used in engine guards, etc., is installed so that this side does not come into direct contact with the frame.

Akrapovic GP Style Titanium Exhaust Slip On BMW S 1000 RR

S-B10SO11-CBT

[Read More](#)

SKU:

Price: ₹115,000.00

Categories: [Exhausts](#)

Product Description

Akrapovic GP Style Titanium Slip On Exhaust S-B10SO11-CBT The GP Style Titanium Slip On Exhaust presents the first step in tuning exhaust systems. It is simple to install and replaces a standard terminal, offering the best compromise between price and performance. With the Akrapovic Slip-On system we have more power, the unmistakable deep and thundering Akrapovic sound, greater torque value and less weight. Each terminal is equipped with high-quality carbon fiber bottoms, also produced by Akrapovic.

Akrapovic Titanium Full System Exhaust BMW S 1000 RR

S-B10E10-APLT

[Read More](#)

SKU:

Price: ₹370,000.00

Categories: [Exhausts](#)

Product Description

The flagship of the Akrapovič exhaust system range, used and tested by top factory teams in motorsport racing. It is simply the finest performance exhaust system available. Each model is unique and dedicated to maximizing the performance of an engine, while reducing overall weight for optimized handling of the whole motorcycle. It is made entirely of titanium. The

unique shape of the muffler, with its embossed imprint that run all the way along the exhaust and blend in seamlessly with the hand-crafted carbon fiber endcap, takes design to new levels. For perfect performance, throttle response and durability, ECU remapping is recommended. On the product image, the system is shown together with optional carbon heat shield P-HSB10E3. Carbon fibre muffler bracket (needed for mounting if passenger footrests are removed) is already included within the system. S-B10E10-APLT

Bonamici Adjustable Rearsets BMW S 1000 RR

B007

[Read More](#)

SKU:

Price: ₹75,000.00

Categories: [Rearsets](#)

Product Description

Bonamici Adjustable Rearsets B007 The rearsets are made entirely from solid material using numerical control machines (CNC) with 3D technology. The use of return springs integrates in the balls and bearings a sphere in place of the bronze bushes, completing the work by manufacturing an excellent product that also offers the most demanding pilots. These platforms can operate with normal and inverted (GP Shifter) gearboxes. Technical features:

- Possibility of adjustment in various positions
 - Integrated brake lever return spring
 - Off-center for millimeter adjustment of the brake lever position
 - Adjustment of the pin point lever to change the millimeter
 - Black anodizing
 - Rubber toe cap
 - Non-slip footrest
-

Brembo Master Cylinder 19RCS Corso Corta 110C74010 BMW

110C74010

[Read More](#)

SKU:

Price: ₹41,000.00

Categories: [Master Cylinder](#)

Product Description

Brembo 110C74010

The 19RCS CORSA CORTA is characterized by the possibility it provides the rider to adapt the braking "bite point" to the desired riding feeling, in addition to the RCS (Ratio Click System), introduced 10 years ago on the Brembo 19RCS radial brake master cylinder, which allows the center distance of the master cylinder to be adjusted to "18" or "20". The master cylinder body is made of forge aluminum alloy, machined with 5-axis CAM technology. A hard oxide coating is used for the surface finish, which guarantees that the master cylinder main body is highly resistant to wear and its components move easily. The floating piston and the seals derive directly from those used in MotoGP, as do the housings for the bleeding and fueling systems, which are inclined by more than 30° to make bleeding the master cylinder easier.

Product Description

Mivv Mk3 Carbon Exhaust Slip On

B036LM3C

Designed to improve the aesthetics, sound and performance of the bike, Mivv slip-on exhausts are the result of maximum attention to design, with the aim of satisfying those who want to distinguish themselves by the look of their motorbikes. The MK3 line, resulting from the experience acquired in Moto3 and Moto2 world championships, is the perfect synthesis between performance and technology. With a design similar to the exhausts made for world championships Moto3 the MK3 is a compact product, capable of releasing the captivating mivv

sound. The Carbon version features a central body in glossy carbon that, in combination with the protective grid on the exit cap, gives the product a particularly high tech look.

Product Description

Puig Frontal Spoiler Black 20522N Reinforce the Racing aesthetics and improve the aerodynamics of your motorcycle with the new frontal spoiler GP from Puig. The new GP spoiler is the result of the most advanced knowledge and technologies in the field of competition motorcycling, and has been designed and manufactured entirely in Barcelona. The GP front spoiler for the BMW S1000RR has been specially designed to enhance your BMW with the most advanced technology in the field of aerodynamics, a direct legacy of high competition such as the MotoGP world championship. Entirely designed and manufactured in Barcelona under the latest technology, the GP front spoiler is made of high-quality 4mm PMMA, a material highly resistant to impacts, splashes and UV. Its special design guarantees maximum safety thanks to the 2mm radius rounded edges. Puig offers the possibility of customizing the spoilers, being able to choose from a wide range of colors. And if the customer wishes, the Puig adhesive kit can be added, which includes the product in the colors blue and red. The piece is easily assembled, no more than 15 minutes, and does not require specific mechanical knowledge or special tools. Fixing through small metal supports and rubber pieces designed by the house. It does not require drilling the original fairing of the motorcycle. There are many benefits that the spoiler produces on your motorcycle, among which +7.8 Kg of Downforce on the front axle, anti-shimmie effect at high speeds and anti-wheelie effect stand out. We can also enjoy greater stability in changes of direction.

Product Description

Rizoma Fuel Tank Cap TF051 The Rizoma fuel tank cap is made entirely from billet aluminum and combines design, technology, high quality materials and safety. The Key Lock System reduces the risk of tampering while maintaining ease of installation and use. The two-tone finish

is obtained through anodization, which keeps it looking good for longer.

Rizoma Stealth Rear View Mirror Pair Black BMW S 1000 RR

BSS010B

[Read More](#)

SKU:

Price: ₹49,000.00

Categories: [Mirrors](#)

Product Description

Rizoma Stealth Rear View Mirror BSS010B Out of the interface between racing experience and aeronautical inspiration comes a new mirror: Stealth, an accessory specifically designed for supersport bikes. It consists of a fixed part, which allows the fitting directly to the fairing, and a movable part, which acts as a mirror glass holder. Thanks to a rotating system, by a simple movement, the two parts get aligned: in closed position the mirror becomes an aerodynamic foil. While the mirror glass holder is always the same, the fixed component is designed ad hoc for each supersport bikes for which Stealth was developed, looking for the best solution to match the relative aerodynamic results. Made of billet aluminum, it has a convex glass surface to provide a wider viewing angle and is available in three different anodized colors. Stealth's design, with its wing-like shape and 25° angle relative to the ground, give it a linear look, ensure it generates downforce, in turn improving the bike's grip and handling performance, especially at high speed. Downforce pressure is around 4 kg at 300 km/h. The ergonomics has been optimized as well: when the rider takes a sporty riding position, the mirrors are aligned with the rider's eye level. In this way, the rider does not have to raise his position to get a correct rear view, keeping the head protected by the headlight fairing and, therefore, by the pressure that impacts the face at high speed.

Product Description

RACE HIGH WINDSCREEN WRS SMOKED +80MM BMW S 1000 RR 2019-2022

BM051F Color: Smoked Windscreen made using high quality PMMA plexiglass, DOT626 approved 2 mm thick. This windscreen is 8 cm higher than the original. Racing windscreen used by numerous teams in the world championships, essential to receive maximum coverage from the air while driving. The design, studied in detail, fits perfectly with the line of the bike, giving it an even more appealing look. Attention: Interchangeable with the original windscreen, it replaces the standard one without modifications. Compatible with all the fairings on which the original windscreen can be installed.
