Product Description

Aella Frame Slider AE-68140 Japan's most famous accessories and special parts company has teamed up with Lanesplit. Introducing Aella's frame sliders for the Ducati Monster 937. These are hand crafted in Japan. In the case of a conventional slider due to the shape of the frame, the left and right mounting heights will differ, but the new design has been made so that they are almost the same height. AELLA's unique taper shape makes it less likely to stick out, and the slider functions well while maintaining a clean impression. The frame slider suppresses damage caused by unexpected falls.

Product Description

Arrow Indy Race Titanium Exhaust Slip On 71939PK

Material: Titanium

Back: Carbon

Internal material: Stainless steel

The Indy-Race line was created for particular applications, especially under the saddle, where it is more complex to use the other standard Arrow shapes. Its new section, which recalls the oval of some tracks of the Indy formula, hence the name, is more flattened than the others and maintains a good internal volume to be exploited to reduce noise emissions. The internal

components are in stainless steel assembled by TIG and MIG welding while the silencer body, very light, is available in titanium, aluminum or carbon fiber.

Categories: [Master Cylinder](#)

Product Description

Brembo 110C74010

The 19RCS CORSA CORTA is characterized by the possibility it provides the rider to adapt the braking "bite point" to the desired riding feeling, in addition to the RCS (Ratio Click System), introduced 10 years ago on the Brembo 19RCS radial brake master cylinder, which allows the center distance of the master cylinder to be adjusted to "18" or "20". The master cylinder body is made of forge aluminum alloy, machined with 5-axis CAM technology. A hard oxide coating is used for the surface finish, which guarantees that the master cylinder main body is highly resistant to wear and its components move easily. The floating piston and the seals derive directly from those used in MotoGP, as do the housings for the bleeding and fueling systems, which are inclined by more than 30° to make bleeding the master cylinder easier.
